RE: Draft Drift Committees Topics for Discussion

October 5, 2006

\*\*\*\*\*

Attached is a list of potential topics for discussion by the drift committees dated October 4<sup>th</sup> 2006. Two issues require your input:

1. Are there other topics which should be addressed?
2. Which committee should tackle which topics as primary issues? There are a number of topics on the list such as notification, health and environmental issues which may require interaction between the two committees.

The technical committee is scheduled to meet on October 23<sup>rd</sup> in Orono, the draft agenda is also attached.
